## CAULK COMPARISON

### Spray Foam BETTER COVERAGE AND PERFORMANCE THAN CAULK

with Flexible Seal Technology

#### Continuous, complete coverage

- EnergyComplete™ Spray Foam with Flexible Seal Technology flows uninterrupted from the spray nozzle to fill cracks and crevices
- There's no need for overlapping or touch-ups

Caulk

EnergyComplete™ Spray Foam

#### Lasting protection—for the life of the home

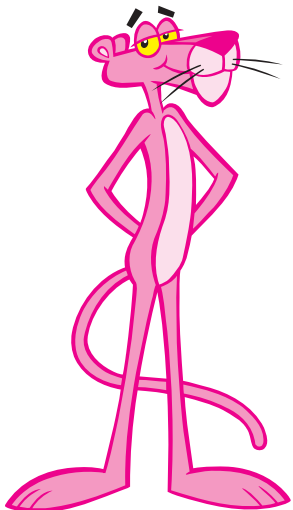

- Better adherence than caulk; creates a long-term barrier against air infiltration

Caulk

EnergyComplete™ Spray Foam

### Forms a more integrated seal

- Unlike caulk, EnergyComplete™ Spray Foam easily penetrates deep in between framing members and into cracks for maximum performance
- Also gets into critical spaces where caulk cannot

Caulk (Above: A gap is visible between the band joist and foundation.)

EnergyComplete™ Spray Foam

### Makes it easy to achieve maximum coverage

- A wide spray nozzle covers a larger area and leaves less chance of error

Caulk

EnergyComplete™ Spray Foam

### Self-cleaning for better adherence

- Self-cleaning action of the spray blows debris from the area to be sealed

Caulk
